

Whitepaper de Moncki Token (MNK)

Executive Summary

Moncki Token (MNK) is introduced as a new meme token on the Solana blockchain, designed to capture the attention of the crypto community with its innovative and participatory approach. With a total supply of 120 million MNK and a strategic distribution model, Moncki is positioned as a promising digital asset for those interested in the evolution of decentralized finance and futuristic technological projects, such as artificial intelligence.

Vision

Our vision is to create a token that is not only an investment asset or medium of exchange, but also a tool to foster an active and participatory community. We seek to integrate our users in key decisions and future projects, especially in the development of artificial intelligence applications that can revolutionize different sectors.

Goals

- Short Term: Establish a solid and committed community, distribute the token effectively and ensure its availability on reputable exchanges.
- Medium Term: Develop smart contracts for future projects and airdrops, increasing the utility and demand of MNK.
- Long Term: Integrate artificial intelligence solutions into the platform, guided and financed by the decisions of the MNK community.

Token Features

- Token Name: Moncki Token
- Symbol: MNK
- Blockchain: Solana
- Total Supply: 120 million MNK
- Transaction Rate: 0%

Distribution of the Token

- Pool Liquidity: 70% (84 million MNK)
- Owner: 10% (12 million MNK)
- Future Projects and Airdrops: 20% (24 million MNK)

This distribution is designed to ensure liquidity and sustainable growth of the token, while setting aside significant funds to incentivize continued development and community participation.

Technology and Security

Moncki Token takes advantage of the high transaction speed and low fees of the Solana network, ensuring a smooth and affordable user experience. Security is a top priority, with regular audits of code and security practices to protect investors' assets.

Roadmap

1. Q3 2024: Token launch and first distribution phase.
2. Q4 2025: Listing on main exchanges and creation of the liquidity fund.
3. Q1 2025: Development of the platform for community voting.
4. Q2 2025: Start of first artificial intelligence projects.
5. Q3 2026: and beyond: Expansion of features and new airdrops.

Community participation

A key feature of Moncki Token is its focus on community participation. MNK holders will have a say in important decisions, including the direction of future artificial intelligence projects. This participation will be facilitated through a decentralized governance platform.

Conclusion

Moncki Token is more than just a token meme; It is a gateway to innovation in artificial intelligence and active community participation. With a well-managed supply and a clear roadmap, MNK is ready to be a key player in the crypto and technology ecosystem..
